

UNDER THE BONNET

(Ford Focus 1.5tdci Eco Blue)

To access under the bonnet, open the passenger door and pull the lever twice (there will be a noticeable “Clunk” heard after each pull) Walk round to the front of the car and raise the bonnet. The bonnet can then be held up using the bonnet prop.

Windscreen Washer fill

Engine Coolant

Brake Fluid

Oil Dip Stick

Oil filler

Check coolant level is between MIN and MAX marks on the coolant bottle – Top up if necessary with correct mixture of water and antifreeze.

Windscreen Washer bottle should be filled to the top with a correct mix of water and windscreen washer fluid.

Check brake fluid level is between the MIN and MAX markers on the bottle. Top up the fluid if necessary with the correct DOT 4 fluid as per manufacturers instruction

Identify the Oil filler cap (It has an oil can picture on it). Unscrew this cap to top up the oil level with the correct oil (see manufacturers specification)

To check the oil level, with the car on level ground and having been stood several hours, remove the dip stick and wipe it clean with a cloth. Re insert the dipstick fully and then remove again. Check the indicated oil level is between the MIN and MAX markers on the dip stick.
